## About Me

I am a 19-year-old IT student with a passion for technology and continuous learning. I am curious, enthusiastic, and dedicated to excelling in areas that interest me.

My multilingual skills allow me to communicate effectively in **Dutch** (native), **English** (fluent), and basic **French**.

I thrive in dynamic environments where I can develop my technical and analytical skills while embracing new challenges.

## Education

- IT & Networking** Sept. 2021 - June 2023  
*Sancta Maria Aarschot*  
 During this program, I built a strong foundation in network infrastructure and system administration. I gained experience working with various operating systems, network protocols, and hardware configurations. Additionally, I developed problem-solving and troubleshooting skills within IT environments.
- Bachelor of Applied Computer Science** Since sept. 2023  
*Odisee Brussels*  
 This program provides in-depth knowledge of software development, data management, and IT systems. My elective subjects include Software Engineering, AI & Big Data, and System Analysis, allowing me to specialize in modern software technologies, data-driven decision-making, and the design of efficient IT systems.
- Applied Informatics** Sept. 2025  
*University of Economics Krakow (Poland)*  
 I will also participate in an exchange program with the Cracow University of Economics, where I will study Applied Informatics for five months. This opportunity will allow me to gain international experience, expand my knowledge, and immerse myself in a different academic and cultural environment.

## Professional Experience

- Waiter** Since July 2021  
*Gasthof Ter Venne, Langdorp*
  - Serving customers and ensuring excellent customer service
  - Taking orders and serving food and beverages
  - Assisting in organizing events and parties
